Extension, Malakpet, Hyderabad - 500036,
Telangana, India. Phone : +91 98851 14772

POLICE CLEARANCE CERTIFICATE (PCC)

A PCC is a mandatory requirement for Visas, Immigration, or Employment in countries like the **USA, Canada, UAE, and Europe**. We provide professional, error-free **Fingerprinting Services** (on Forms like **FD-258, C-216C**) to ensure your clearance process is smooth and rejection-free.

INSURANCE INVESTIGATION

We assist Insurance Companies in distinguishing between genuine accidents and **Insurance Fraud**. Our experts investigate fire scenes (Arson), vehicle accidents, and property damage claims to uncover the truth and prevent financial loss.

CROSS EXAMINATION SUPPORT

A case is often won or lost during cross-examination. We assist Lawyers and Advocates by drafting **Technical Cross-Examination Questions** to challenge faulty reports or unqualified experts from the opposing side, ensuring the scientific truth prevails.

LIE DETECTION (POLYGRAPH) TEST

We conduct scientific Polygraph tests to verify the truthfulness of a subject's statement. This is a powerful tool for private investigations, internal corporate thefts, and clearing the names of the innocent.

FORENSIC TOXICOLOGY

We analyze biological samples for the presence of **"Drugs of Abuse"** (Narcotics, Psychotropic substances) and poisons. This service is vital for suspicious death investigations, workplace drug screening, and addiction verification.

FORENSIC BIOLOGY & DNA

We offer high-precision **DNA Testing** for Paternity / Maternity disputes, infidelity cases, and biological identification. Our DNA reports provide conclusive biological evidence with near 100% accuracy.

WHO WE ARE

Forensic Talents India LLP is a premier, private Forensic Science Laboratory dedicated to delivering high-fidelity investigative solutions. Established in **2012**, we are a legally compliant entity registered with the **Ministry of Corporate Affairs (MCA), Govt. of India (LLPIN : AAE-8275).**

With over a decade of excellence, we bridge the gap between scientific analysis and the legal justice system. Our organization acts as a trusted partner for Law Enforcement Agencies, Courts, Banks, Insurance Companies, and Corporate firms, ensuring that every piece of evidence tells its true story.

LEGAL ADMISSIBILITY

Our expert opinions are scientifically rigorous and **fully admissible in all Courts of Law** across India. We operate in strict compliance with:

- **Bharatiya Sakshya Adhiniyam (BSA), 2023 :** For all new cases, our Expert Opinions are admissible under **Section 39**, which explicitly recognizes experts in science, art, handwriting, and fingerprint analysis.
- **Indian Evidence Act, 1872 :** For ongoing older cases, our reports remain valid under Section 45.
- **Digital Evidence Compliance :** We provide the mandatory **Expert Certificate** under **Section 63(4)(c) of the BSA** (formerly Section 65B of IEA), ensuring your digital evidence is accepted by the court without procedural rejection.

BEYOND INVESTIGATION

We are committed to building a "Forensic-Ready" nation through:

- **Internship & Training :** Comprehensive, hands-on industrial training for students to bridge the gap between academic theory and real-world investigation.
- **Awareness Programs :** Specialized workshops for Banks, Corporate offices, and Educational Institutes on Fraud Prevention, Document Security, and Cyber Safety.

OUR EXPERT SERVICES

FINGERPRINT MATCHING & VERIFICATION

We utilize advanced ridge-counting and minutiae analysis to verify identities with absolute certainty. Our services include forensic comparison of thumb impressions on property deeds, wills, government registries, and agreements to detect impersonation fraud.

SIGNATURE VERIFICATION

Is that signature genuine? We perform microscopic analysis of stroke flow, pen pressure, and tremor patterns to detect **Forgeries** (Traced, Simulated, or Cut-Paste). We verify signatures on Cheques, Wills, Promissory Notes, and Business Contracts.

HANDWRITING VERIFICATION

We identify the authorship of disputed writings. By analyzing individual writing habits-such as slant, spacing, and letter formation-we can scientifically link a suspect to **Anonymous Letters, Suicide Notes, or Ransom Notes.**

FINGERPRINT DEVELOPMENT

Latent (invisible) fingerprints are often left behind at crime scenes. We use specialized chemical methods and powder dusting techniques to **Develop, Lift, and Preserve** fingerprints from doors, glass, safes, and other surfaces to identify intruders in theft or burglary cases.

AUDIO & VIDEO VERIFICATION (DIGITAL EVIDENCE)

In the age of "Deepfakes," we analyze audio/video files for tampering, editing, or splicing.

- **Legal Note :** All our digital forensic reports are accompanied by the mandatory Section 63(4) Certificate (BSA), ensuring they are admissible as primary evidence in court.

CRIME SCENE INVESTIGATION

Our rapid-response team visits crime scenes (Murder, Suicide, Arson, Theft) to scientifically collect and package evidence.

- **Legal Note :** Under the new Bharatiya Nagarik Suraksha Sanhita (BNSS), forensic investigation is mandatory for serious offenses. We ensure your case complies with these strict new legal standards.
